

CloudPath™

Most Reliable, Resilient and Affordable Cloud

Scalable. Accessible.
Secure. Private.
Expert Support. Easy Migration.
No hardware. No headaches.
Our Service. Your Solution.

Business Benefits

Grows with your business. Think of CloudPath™ as your own secure, private “virtual data center” in the cloud. Set up, manage, and customize your VMs and cloud resources on-demand using our beautiful web-based interface. Add CPUs, memory, and storage as your business grows.

99.999% paranoia guarantee. CloudPath™ is hosted in Pathway’s Tier III certified and SSAE16/SOC 2 compliant data center. Our fully redundant infrastructure is sourced only from world class partner. We’ve invested heavily in paranoia so our SLAs actually have meaning.

Secure productivity. Get work done at anytime from anywhere. Our secure web-based portal allows you to remotely access and manage your cloud servers and applications from any device.

Empower your team. Install applications as needed. Add users and assign roles. Check usage and system health alerts. You remain informed and in full control.

Reduced costs. Avoid the hassles of buying, configuring, maintaining, and managing equipment. Benefit from a much lower total cost of ownership and low, predictable monthly fees.

Peace of mind. Your cloud infrastructure is proactively monitored 24/7/365 for performance issues and bottlenecks. Your connection to the internet is monitored every three minutes. That’s 14,400 times a month!

Secured on Canadian soil. Your data is kept on Canadian soil at all times. It is never accessed without your permission and is not subject to the U.S. PATRIOT Act. Your data is always protected by certified firewalls, encryption, and intrusion detection and protection systems.

Expert support & onboarding. Your dedicated account manager will help you through the entire migration process, and our network, server, and security experts will work with you to customize your environment to your specific needs.

Our Services

	Popular Choice			
Small Businesses	Medium Businesses		Large Businesses	
Cloud 1	Cloud 2	Cloud 3	Cloud 4	Cloud 5
\$199.99	\$299.99	\$399.99	\$599.00	\$979.00
1 CPU core	2 CPU cores	2 CPU cores	4 CPU cores	4 CPU cores
4 GB RAM	4 GB RAM	6 GB RAM	8 GB RAM	16 GB RAM
50 GB storage	100 GB storage	150 GB storage	200 GB storage	500 GB storage
0.8 TB data transfer	1.5 TB data transfer	1.5 TB data transfer	1.5 TB data transfer	2.0 TB data tTransfer
1 public IP address	1 public IP address	2 public IP addresses	2 public IP addresses	3 public IP addresses
1 basic firewall	1 basic firewall	1 basic firewall	1 basic firewall	1 basic firewall
1 domain name	2 domain names	3 domain names	3 domain names	5 domain names

Additional Features

- Unlimited traffic between VMs
- Secure VLANs
- Cloud management console
- On demand scaling and provisioning
- & more...

If you need an exclusive package, we can build one from scratch.

We specialize in [Managed Services](#). You can focus on your business, while we look after your cloud infrastructure.

Weigh your options

In-house server hosting

- Require a room with sufficient & redundant connectivity, power, and cooling resources.
- Purchase hardware before setup.
- Time to configure server, install OS, & software.
- Setup time can be as long as 3 weeks.
- Perform quarterly software maintenance, install & operate system patches, and schedule downtime to perform this work outside of business hours.
- Perform annual hardware maintenance to prevent failure and unexpected downtime.
- Address security problems on a case-by-case basis
- To scale an IT solution, repeat the above timelines.
- Required to double all hardware and software costs for redundancy.
- Backup of all business critical information, and maintain copies of relevant software.
- Hire a full time IT Manager to manage all aspects of server implementation and maintenance as well as be responsible for maintaining critical business functions.

Cost of business redundancy

Cloud virtual machine

- IT infrastructure is hosted in our Canadian Tier III certified & SOC 2 compliant data center which has multiple upstream connectivity providers, redundant emergency generators and backup cooling.
- No hardware costs. Predictable monthly fee.
- Save time by using peconfigured templates.
- Basic server setup can be completed in under one hour.
- Scheduled & unscheduled downtime avoided by the use of test environments before deploying new IT solutions.
- Hardware is abstracted in the cloud.
- CloudPath is securely hosted within our Tier III certified and SOC 2 compliant data center.
- Scale the solution with a click of a button.
- Redundancy & uptime are part of Cloud technology. No additional load balancing required.
- Pathway offers a selection of business continuity options . Ask us about it!
- Pathway's CloudPath™ Managed Services is a complete solution. Our experts fully manage the Cloud infrastructure.

CloudPath™ Managed Services

With Pathway's CloudPath™, you get access to experienced engineers who can work with you to manage your backups, servers, and operating systems. Complimented by our full suite of managed IT, internet, and telephone services, we cover your every need.

Disaster Recovery as a Service

From computing, desktops, servers, storage, and connectivity, Pathway's "full stack" disaster recovery offers protective measures and planning that keep your most critical business systems running during the unthinkable. Disaster recovery doesn't have to cost a fortune. Our cloud-based implementations allow your company to rapidly implement highly scalable and agile solution. Contact us for more details and put our 19 years of experience building full stack solutions to use.

Pathway Communications

Pathway Communications is a privately-held Canadian company, established in 1995. We're based in Markham, Ontario and maintain technical, management, and administrative staff on three continents. We own and operate three, fully-equipped Data Centers in Markham, downtown Toronto, and Montreal and have development and technical teams in Pune, India and Timisoara, Romania.

Our single-source and comprehensive full stack approach to technology execution and outsourcing has seen us implement major solutions for clients from a wide range of industries, including retail, financial services, oil and gas, government, and manufacturing. Our client base ranges from SMBs all the way to large, international publicly traded and indexed firms.
